# Disposable nappy facts

You can throw disposable nappies away so there is no mess or smells.

Disposable nappies can absorb more urine than towelling nappies.

Disposable nappies do not use electricity because they do not have to be washed.

Babies will wear about 5,000 nappies. All of these go into a bin and then into landfill.

Towelling nappies can be used for other things, e.g. changing mat.

If you use towelling nappies, you won't have stinky nappies in your bin.

The poo in towelling nappies needs to be scrubbed before they are washed.

Disposable nappies are light and easy to carry.

Towelling nappies are cheaper because they can be washed and reused lots of times.

Towelling nappies are made from natural materials that are better for a baby's skin.
