

# What do plants need?

If a seed is not **warm** enough, it will not germinate.

Germination is when the seed starts to sprout in to a plant.

If a plant does not have enough **light**, it will grow to be tall and flimsy as it searches for light. It will probably die.

If a plant is not **watered** enough, its stem will be fragile and have very dry leaves. It will eventually die.

## Key vocabulary

- light
- water
- air
- soil
- sprout
- germination
